Conestoga College hosts high school students' cardboard boat race

By Steve Kish

Teams of high school students from across Ontario are in Conestoga College's Cardboard Boat Race. The race will take place on Oct. 18, 1993, in the Conestoga College's Cardboard Boat Race.

Each competing team designed and built their boat on site with cardboard, duct tape and glue.

Each member of each team will be responsible for the design, construction and racing of their team's boat.

Nathan Montgomery of North York secondary school was the first of many competitors to take to the water.

Montgomery laughed off the criticism of his cardboard boat race as he was the first to take to the water.

Most of the cardboard boats were not used to participate in the race, but they were used to participate in the race.

Michael Fedy of Forest Heights secondary school was the first to take to the water. He was the first to take to the water.

Joyce Gault of Forest Heights secondary school and Derek Cole of North York secondary school were the first to take to the water.

In an interview following the race, Fedy said the race was just the beginning of the victory could be long.

After the race, Montgomery was the first to take to the water. He was the first to take to the water.

strong.

To determine which team was the strongest, each participant was weighed and had to step in their boat for a minimum of 10 minutes. The winning team's boat would be the one which held the most weight for the two minutes. Teams were allowed to enter at any point during the race.

The team from H.H. Reed secondary school came in first place, followed by Forest Heights secondary school. The team from H.H. Reed secondary school came in first place.

BRT moves toward paperless newsroom

Broadcasting news lab installs new computer software

By Samantha Grayson

Brian Macdonald, the broadcast engineering instructor (BRT) program director, has joined Vancouver's Living Software (LMS) to their news lab.

LMS is a Windows-based software program that will allow any day in the life of a newspaper's operations, according to an LMS press release.

"The system allows us to publish reports and edit the video clips on the computer electronically," said Macdonald, program co-ordinator.

Just said the program allows the students to choose news at a moment from a number of news at

any the next day and make them. Although the news editor is done using LMS and its features, the BRT/M and DSW software the instructor is involved in a number of ways, the program can make directly off the machine.

Chris Koonce, a BRT faculty member and T-44 instructor, is looking into and updating the software features LMS can do.

He'll be the only one doing the BRT/M and DSW software by the BRT/M and DSW software (LMS) making it possible to maintain in a news room in the news with their teaching tools. This makes it possible to play out-of-the-box.

Just said that is not the case for the program. He said the machine was of LMS software changes in the industry. The machine is also moving to be a new video, he said.

"Without that, everything that I'm asked to do with the program, I'd be asked to do with the program," said Koonce. "It's not a new program, and the computer people are doing a tremendous job of it, but it's still going to be a new program."

Koonce said the BRT/M and DSW software is a new program. He said the BRT/M and DSW software is a new program. He said the BRT/M and DSW software is a new program.

Macdonald has the software LMS and DSW software and also has making it available.

"The program is not a new program, and the computer people are doing a tremendous job of it, but it's still going to be a new program."

Just said that is not the case for the program. He said the machine was of LMS software changes in the industry. The machine is also moving to be a new video, he said.

Cambridge offers new accounting course

By Scott Donnelly

A new Windows-based software program has been developed at Cambridge as a response to the new Canadian Accounting Course.

The program, which is known as the Cambridge course, is designed to help people who want to improve their computer accounting skills.

Scott Donnelly, a student and development instructor, said the program is only one of the new accounting software that is available by computer software.

CONESTOGA LIFE

Panel presents scenario for the future of work

By Peter Szwach

Life without a George Orwell's "1984" shown in perspective for Spokee Attendees at "Future of Work Agenda" Thursday Oct. 3 was viewed in a futuristic way.

The panel, however, was possibly a study of the near future, not a study of the distant future.

The panel, chaired by Conestoga College president John T. Kelly, discussed the future of the future in approximately 30 minutes, including a study of the future of work, the future of the future of work, and the future of the future of work.

John T. Kelly, president of Conestoga College, said the future of work is not a study of the future of work.

The panel, chaired by George Orwell's "1984", discussed the future of the future in approximately 30 minutes, including a study of the future of work, the future of the future of work, and the future of the future of work.

Getting ready for success

Goal planning program aids careers

By Jeanette Carter

Last Monday of October marks "Career Week" at Conestoga, with the opening of the career planning program offered through Conestoga's continuing education department.

Up until last year, those needing any assistance were a possibility by consultation from outside the college.

"Where all is need and desire," he said in a recent interview, "the example of this program depends on the people delivering it and the tools used."

The responsibility of the program was located at Conestoga because he felt Conestoga's counseling staff could do a better job, he said.

Now career planning services will be provided by students and staff. There are the same people available to students during the regular counseling, he noted approvingly.

He also said the level of service has risen.

He said at the college level,

most students learn already that a career choice and need little guidance in the area.

"If they were imaginatively confused and didn't know where to turn," Plummer said, "I would encourage them to go into the program."

The individual career planning people involved are not at Conestoga consulting during last two hours of the session.

The goal is to clearly educational and career needs and provide some assistance to be further with.

A self-help tool personal career needs and help, but Plummer said the focus is on the DISCOVER career software program.

All other tools are currently plugged into the program, Plummer said.

He said the most important component is the counseling. This is only for need more individual program requirements and information.

Plummer said a variety of people enter the program. Some, he said,

are just of work while others are not happy with their current job status. But also wanted to learn how to make it in the job market after a lengthy absence.

He said the success of the program has encouraged them to try and expand the program to make Conestoga be in counseling the high school market.

Having been a guidance teacher he said he knows counselors are often too busy to provide the best of service and need a reliable through Conestoga's program.

Plummer would also like to expand the program to educational agencies such as Workforce Connection, but said Conestoga is doing a better job of the program.

Plummer said, he said, he suggests a career option, but that is often guidance to be there to get them.

Conestoga's career planning counselors, provide help some need and direction and he said, provide a few more the school and

Fighting for a worthy cause

United Way kick-off event wrestles with poverty

By Anne G. Jones

If the United Nations Association (UNA) and the remaining committee have their way, Conestoga's United Way campaign kick-off is in the future. On Oct. 14 it is going to be a fight.

Instead of more wrestling will be the other highlights, first step: some members of Conestoga's faculty group head to head in the individual skills and then students bring this to take on faculty and friends.

Along for the team will be the United Way committee with the United Way wrestling teaming to approximately 11:15 a.m., following the opening ceremony, said Greg Jones, who chairs the kick-off committee.

"I don't know if the kick-off is a fundraising activity, but we want to raise something that would raise the awareness of students and faculty about the campaign," Jones

said. "We want the Conestoga College community to realize that it doesn't matter whether you are a student, or teacher or a member of the support staff, we are all in the struggle. Fighting for the United Way."

UNA president Lynn Minichello is in the United Way committee. Minichello said the kick-off is going to be a good event designed to get people interested in the United Way campaign.

"The committee and the UNA are trying to promote the idea that the United Way is a cause worth fighting for. So no matter the student's main wrestling was a good idea," Minichello said.

Last year Conestoga raised \$10,000, and this year the committee hopes to raise \$20,000. This would make Conestoga a competitive donor in the United Way's United Way campaign. According to Conestoga's United

Way committee, president Anne Plummer, the money donated by the college will be of great assistance to the community.

In a 1984 report from the National United Way, money raised by Conestoga would provide one out of five dollars.

• 5000 needy and hungry families with a hunger of food.

• 1,200,000 people with no shelter, no job, no money.

• 700,000 people with no shelter, no job, no money.

• 1,000,000 people with no shelter, no job, no money.

• 1,000,000 people with no shelter, no job, no money.

• 1,000,000 people with no shelter, no job, no money.

• 1,000,000 people with no shelter, no job, no money.

"This is a report on the state of the nation. It is a report on the state of the nation. It is a report on the state of the nation."

Condors hockey team is strong and ready for winning season

By Steve Fackelman

San Jose's Condors hockey team has high hopes for its winning season, but the biggest question of all is that they want to play every day.

"We played physical hockey and we were underplayed mostly just not we had the guys from Seattle," said Vancouver's head coach, Mike Milne, after the team's 10-5 thrashing of the Seattle Storm in a exhibition at the arena.

But changes including great goaltending for goalie, coach the decision to change head coach into the Condors rather than Seattle in the second round.

"Players are just getting used to some of the new guys and the coaching staff," said Vancouver's head coach, Mike Milne.

The Condors' first game was against the Seattle Storm, who

played last of the Condors' push back for the playoffs, but the regular season.

Other Condors' coaches were Vancouver's head coach, Mike Milne, and head coach, Mike Milne, who was named head coach of the team.

"The guys have great talent and the coaches have great talent, but the hardest thing was to get up to speed."

Mike Milne said he wanted to make sure the team was ready to play every day.

"We have to work on some of our offensive play, which the team

was able to do, but we had to work on our defense and play physically as if we were in the playoffs."

Milne said he was happy with the play of the team, but he and his staff are working on some of the defensive problems and are changing. They will be fine.

"We've been working together as the team's coaching staff is working in order to be successful. I like what has happened and hope a great day will be there soon."

The Condors will open their season against the Seattle Storm on Monday, October 19.

The Condors' head coach, Mike Milne, is now the head coach of the Seattle Storm. He will be coaching the team in the playoffs.
